Duran Bottles-Square Clear & Lids

GRADUATED, with PP Blue Cap & Blue Pouring Ring, DURAN

The increasing number of samples and reagents causes a real problem in terms of space on shelves, in refrigerator, autoclaves or transport. Due to their square shape, DURAN® square bottles save up to 20% of your space compared to round laboratory bottles and therefore you save costs. The quality of glass and workmanship of first class DURAN® is naturally identical to that of the round bottles.
